Subject: FYI - Wrapping up CZARA write-up

Hi Everyone,

Quick update - I just talked with Alan, Don, and Allison and wanted to let you know that I'll be coordinating the last comments and incorporating NMFS's and Lynda's comments into the latest version that Don sent around late last night. We'll have something for you all by around 10AM PST/1pm EST, and if we want to discuss more at the Managers' Call at 11AM PST/2pm EST today, we can.

As Allison has sent around in her email, NMFS hasn't had enough time to review what we've put out, and so we're focusing in the write-up on what the State needs to do for CZARA approval knowing that the forestry actions will be helpful for coho recovery. At this point though, it looks like NMFS may need more time to come up with forestry actions needed for coho delisting. - Thanks

Subject: RE: URGENT TO DO on Oregon CZARA by end of day 1/6/2015

Apologies to all, but please use this version moving forward. The previous version I just sent around missed a few touch-ups. Thanks.

-Don

Thanks, Jenny. That was quick!

This version provides additional clean-up and formatting for ease of reading and re-inserts some text (in the form of a comment box) that Steve Sweeney and I would like considered. See p. 2 near the top (Riparian Buffers for Small Non-Fish Bearing Streams). It also fixes a misspelling ("explicitly" à "explicitly").

Please use this version for any final touch-ups.

Don

Hi Everyone, I took Don's latest version and also reformatted so that there's some consistency in the bullets. I've highlighted in yellow the areas that we'd include if NMFS were to buy off on these actions being helpful for coho recovery. I think Christine, you'd indicated that if NOAA gives the thumbs up on the language, we keep it. Otherwise, NOAA can make the call on whether to change or strike the language.

Christine, this version includes comments from Steve, Dave, Don, Allison, Alan, and me. Look at the clean version for easier reading.

All,

Here's a clean version, as promised. I left a couple of comments in that still may need to be addressed (...heads-up, Jenny!) This version was created by accepting all changes and cleaning up the formatting. Once I did this, I discovered a few spots where obvious word edits were needed, so I made those, as well.

All,

I have added a few edits to Allison's version, as well. I also tried to reconcile Steve Sweeney's edits/comments (which he made to the original version and sent only to the tech team) to the current version. So the attached version includes edits and comments from:

Alan, Allison, Steve & me. (Am I leaving anyone out?)

I think the next step is to come up with a clean, nicely formatted version and ensure that all comments have been addressed. I can do that tomorrow morning, if needed (...will touch base with Allison in the morning).

Christine--

Thanks for taking the lead on this. My comments/suggested edits are attached for your consideration. I added track changes to a version Alan already had made some changes to to make sure statements in this summary aligned with statements in the decision doc. Most of my comments and changes were made along the same lines--to ensure consistency with current lang. used in the decision document. I think that is important and something I know Jeff has focused on during his legal reviews as well.

As a general comment, I know our goal is something short and sweet but we may want to consider reformatting our options as a list of bullets rather than as an in-paragraph list to improve readability. I found it a little difficult to read a long list of recommendations in paragraph form.

I have shared with NMFS and will let you know if I hear back from them in time for the 10:00am PST deadline. Otherwise, we may need to say these are some preliminary thoughts pending further discussion with NMFS.

Allison
